## **Bloom's Taxonomy: Extreme Weather**

1. What is a hurricane and what effects does it have?
2. Explain in your own words the importance of the eye of the of the hurricane
3. You live in an area that could experience a natural disaster of your choice. Research some effective survival techniques and share these with your fellow students.
4. In what ways are hurricanes similar to tornadoes? In what ways are the different? Use a Venn diagram to diagram your answer.
5. "Extreme weather events are disastrous." How far do you agree with this statement in relation to two or more extreme weather events?
6. What if we could predict extreme weather events more accurately?

J Farrall, AISSA 2016.
